

INNOVATIVE SOFTWARE FOR PERFORMANCE REPORTING

Data Analysis Tool™ from Cirus Controls is sophisticated, easy-to-use reporting software that lets you understand and effectively utilize application data. Using Data Analysis Tool allows you to identify patterns in application variables which can help your organization develop best practices reduce operator hours, conserve deicing and anti-icing materials and increase overall cost-effective operations.

DATA ANALYSIS TOOL

- Generates Cirus performance reports
- Exports data in Excel spreadsheets
- Creates Shape file formats
- Compatible with GIS programs
- Interfaces with other Cirus telematics systems

Reports & Mapping
