

FLEXIBLE CONFIGURATIONS FOR OPTIMAL MANIFOLD VALVE SYSTEMS

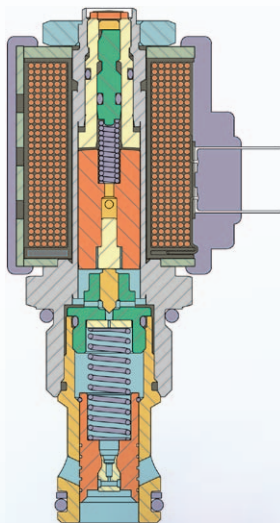

Featuring HydraForce cartridge valves, modular manifold systems from Cirrus Controls provides wide-ranging capabilities and function configuration for optimum performance. Modular manifolds from Cirrus are available in numerous designs and offer more precise proportion control and consistent operation so you can deliver unparalleled winter maintenance.

MODULAR MANIFOLD SYSTEMS

- Multiple flow, pressure, performance and function configurations
- Proportional and on/off hydraulics for mobile applications with manual overrides
- 5 year warranty on valve and coil assembly
- Open or closed center options
- Standard A and B port relief
- HydraForce E coils and IP69 connectors for extreme environments
- 5 – 40 GPM flow capacities
- Adjustable pressure ratings up to 3500 psi
- Standard load holding on cylinder selections
- Standard 6061 aluminum manifold block
- ISO 9001: 2000 certified manufacturing
